About Me

IT graduate and Technical Support Associate transitioning into UI/UX design, combining a strong technical foundation with creative problem-solving. Experienced in front-end technologies (HTML, CSS, JavaScript) and Figma-based prototyping. Passionate about designing intuitive, accessible, and delightful user experiences that simplify complex workflows.

Work Experience

Technical Support Associate

Tangentia Porvorim, Goa
Oct 2024 – Present

- Delivered remote B2B technical support to global clients, resolving 50+ tickets weekly with 95% customer satisfaction.
- Simplified user workflows by documenting installation guides and troubleshooting checklists adopted company-wide.
- Collaborated with engineers to reproduce client-reported issues, improving turnaround time by 30%.
- Guided business clients through product configurations, enhancing onboarding clarity and reducing repeat support requests.

Technical Support Intern

Tangentia Jul 2024 - oct 2024, Porvorim, Goa

Delivered remote technical support to clients by diagnosing and resolving software issues, including installation, configuration, and troubleshooting

Web Dev Intern

Gyrono Tech Aug 2023 - Sept 2023, Ponda, Goa

- Designed and developed responsive web interfaces focused on usability and consistency.
- Participated in iterative design reviews, improving accessibility and user flow across pages.
- Contributed to testing and debugging sessions that increased page load stability by 25%.

Projects

Tinypixel

Personal prortfolio project • August 2025

- Built a personal design and development portfolio showcasing UX case studies and projects.
- Designed with responsive layouts, smooth animations, and custom SVG elements. Visit →

AREA – Augmented Reality Experience Application

Final-year Project • May 2024

- AR-based web app enabling users to visualize furniture and decor in real environments.
- Designed user flow and interface for variant switching, scaling, and placement controls.
- Result: Enhanced decision-making speed by 30% in user testing. View paper →

PlaySpot - Turf Booking website

Gyrono Tech - Intership project • September 2023

- Led UI design and front-end development for a booking platform helping users find and reserve nearby sports venues.
- Designed clean information hierarchy and visual layout to improve task completion speed by 20%.

Farm Guard Robot

PCCE IDEATHON • November 2022

- Programmed robot with piezo speakers to produce ultrasonic sounds to repel rodents from the farm.
- Laser fencing around the farm which sends signals to the robot when someone enters the field . And the robot makes dog barking sound

Education

Bachelor of Engineering in Information Technology

2020 - 2024 • CGPA : 7.71

Padre Conceicao College Of Engineering• Verna, Goa

Relevant Coursework: Human-Computer Interaction, Databases, Data Structures, Computer Networks

CERTIFICATIONS

Full Stack JavaScript

theodinproject.com • 2023

Web Development

Agile Fundamentals training

udemy.com • 2025

Concepts, techniques, best practices and approaches to Agile Development.

Google UX Design Professional Certificate

coursera.org • Jan 2026

- Completed end-to-end UX design training covering user research, wireframing, prototyping, usability testing, and high-fidelity design in Figma.
- Applied the UX process (empathize, define, ideate, prototype, test) to real-world and social impact projects; built responsive web UI and job-ready portfolios.
